

DATE: March 6, 2019

TO: Board of Education

FROM: Dr. Robert Leri, Superintendent Chief Learning Officer

SUBJECT: First Read and Proposed Revisions to Board Policy and Administrative Regulation 3514 Environmental Safety

PRESENTED BY: Todd Rivera, Executive Director of Business

---

ACTION REQUESTED:

Review Proposed Revisions and Provide Direction to Bring Back to the Next Regular Board Meeting for Approval

BACKGROUND INFORMATION:

Policy and regulation updated to reflect new law (AB 746) which provides that, if a community water system finds lead above specified levels in a school's potable water system, the district must notify parents/guardians, shut down fountains and faucets, and provide a source of drinking water to students. Policy also deletes details regarding district strategies that are duplicated in the Regulation. Regulation also updates material related to particulate filters in school buses and carbon monoxide detectors to reflect current law. Administrative Regulation has been provided as information only.

RESOURCES REQUIRED: NA
